

Charter 375-2 A humanitarian flight to deliver critical food supplies to remote African airstrips.

You are chartered to fly food supplies on a 7-leg tour, to remote airstrips around Mount Kilimanjaro, Tanzania in Africa. Starting from Mombassa (HKMO) in Kenya and ending at Kilimanjaro Intl.(HTKJ) Some of the airstrips and approaches alone, will challenge your flying skills. Flights range from 33 NM to 81 NM. (Total=370 NM)

The areas surrounding the mountain have suffered from a unusually poor crop yield this year and are in dire need of supplies to see them through the next few months.

Some of the supplies you are delivering are perishable and time is an issue. It is recommended that you complete these flights in succession to avoid unnecessary spoilage.

Flights need to be flown in daytime only.
