

Atlantic Air Cargo  
Operated by Julio Castrillo and son Robert Castrillo

2 planes – N437GB and N705GB

Updated December 2022

Both of the Atlantic Air Cargo planes are down at the same time, one for an engine overhaul, and the other to repair damage caused by a fuel truck hitting the fuselage.

Julio and Robert really need your help to deliver a load of supplies. So, come fly your DC3 from Florida to the Bahamas, carrying everything from Newspapers to furniture, to groceries, to beer, to clothes, to tools, everything that people have to have to live day to day; and when the flight is done, and the cargo is unloaded, take a break in the beautiful sunny Bahamas, swim, fish, and enjoy some fine dining in the many local restaurants before you have to get Ready for the return flight, which is usually empty, unless there are some return goods.

Opa Locka, Florida (KOPF) to Nassau, The Bahamas (MYNN) and return

Daily VFR flights, usually depart mid morning and return in the afternoon Cargo varies from 4,000lbs to 6,500lbs;

**Leg 1**

From – To	<b><u>Flight Description.</u> "Allocated runways and related information may change when flying online or using Real Weather"</b>				Course (Leg) Deg	Distance (Leg) nm	
	Dep. Rwy – 27L	Init. Hdg –106 deg	Init. Alt – 2,500ft	Apt Elev. – 08ft			
Opa Locka (KOPF) USA  To Nassau (MYNN) Bahamas	Departure: Init.Hdg-106 deg. Tune 116.70 (ZBV VOR), stay at or below 2,500ft till 36 miles DME to clear Class B airspace. When clear of Class B airspace, climb to 5,500ft. Navigate to VOR (Bimini Island).				106	54
