

DC-3 World Rally 2005 flight WR 05-05.

Welcome to two flights in New Zealand for the price of one! Again my thanks go to Mark Beaumont for suggesting this gem of a flight to me.

Both flights are quite short and consist of an initial flight from Queenstown to Milford Sound, followed by the return flight to Queenstown. Simple...!!

I think you will find both the departure and arrival at both destinations are a little out of the ordinary, and if the weather is as I suspect it might be! Then strict adherence to the Flight Description would be recommended.

It is important that you fuel up at Queenstown with sufficient fuel for both flights as there are no refuelling facilities at Milford Sound.

Although all the navigation requirements depend on a single VOR I have endeavoured to make the flight interesting with a variation in the way I have used the VOR.

It is important to the flight that you begin with the Queenstown to Milford Sound flight.

Have fun and enjoy the flights.

Don't forget to check fuel levels and payload before departure.

---o-O-o---
