

to see *Hawaii*
you **MUST SEE**
ALL THE ISLANDS

There's something to see, something to do on all the islands of Hawaii, all year round. All the islands are different . . . each is only a few scenic minutes from your Waikiki vacation hotel via TPA Alohaliner, or panoramic Vistaliner—the aircraft with *both* picture windows and TPA's exclusive aerial camera windows.

Here, on these islands so near Waikiki, is the Hawaii you came to see—the highest mountains in the Pacific Ocean, beaches of jet-black sand, primitive settlements hidden in rainbow-colored valleys.

You who are camera enthusiasts have a special thrill ahead when you fly in your TPA Alohaliner over the scenic grandeur of the Islands. Alohaliners are equipped with exclusive, camera-designed windows for better aerial photography. These windows have lens ports that allow you to put the lens of your camera directly out into the air, avoiding the glare and distortion of photography through a windowpane.

And Alohaliner and Vistaliner alike fly specially at the smooth lower altitudes so you can see more of the scenery you came so far to enjoy . . . and so you can better photograph it through the camera windows.

ALOHA AIRLINE FARES are low, with the Aloha Airline Half-Fare Family Plan helping you to economize even more on your tours every Tuesday, Wednesday and Thursday.
