

Union of Burma Airways

This schedule was designed with FS2004 but should be mostly OK for FS98,FS2000,and FS2002.

If a Navaid is "missing," check whether it has a different frequency. If it is truly missing, fly with Dead Reckoning to the next Waypoint. NOTE: the reception range of a Navaid may vary from one FS version to another. Again, use Dead Reckoning if necessary.

Pilots must determine appropriate Runways, Flight Altitudes and Field Elevations.

Use "Real Weather" with all flights.

NOTE: If "DR" appears in a flight description below, fly the suggested course using Dead Reckoning until you receive the Navaid signal from ahead or sight the airport.

Please Email us if a difference is noted from the schedule details and we will post it on the NOTAMS Page.

Flight	From To	NM	Description	Airport IDs	Dep	Arr	Comments
UB-201	Yangon, Myanmar - Bangkok, Thailand	390	Dep Yangon using reg proc to MDS NDB, 397.0 (1.5 nm SW of field), then 107deg to MM NDB (330.0), then 73deg to MS NDB (316.0), then 74deg to TK NDB (332.0), then 148deg to TL NDB (350.0), then 165deg to BK NDB (293.0), then 209deg for 6.6nm, Land Bangkok.
